Application/Control Number: 10/039,291

Art Unit: 1614

•

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim 1, drawn to a fluoride composition, classified in class 424, subclass
 673.
- II. Claim 2, drawn to a fluoride mouthwash, classified in class 424, subclass52.
- III. Claim 3, drawn to a fluoride patch, classified in class 424, subclass 449.
- IV. Claims 37 to 41, drawn to a tooth treatment kit, classified in class 206, subclass 369.
- V. Claims 4 to 36, drawn to methods for irradiating the surface of a living tooth with laser light source, including dependent claims 24 to 29 to further fluoride treatment with fluoridated after treatment with fluoride mouthwash, fluoride toothpaste and/or fluoride patch, classified in class 433, subclass 215.

Inventions V and I, II, III and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed, (Fluoride composition, fluoride mouthwash, fluoride patch, fluoride toothpaste and tooth treatment kit) can be

Application/Control Number: 10/039,291

Art Unit: 1614

used by themselves, and without any step of also irradiating the surface of a living tooth with a laser light source which can be used in periodontal laser light surgery of the gums (as opposed to laser light irradiating the surfaces of fluoride-treated teeth).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group V is not required for Group I, II, III, or IV, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shep Rose whose telephone number is (703) 308-4609. The examiner can normally be reached on Monday, Tuesday and Thursday from 7:30 AM to 6 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on (703) 308-4725. The fax phone numbers for the organization where this application or proceeding is assigned are (703)

Application/Control Number: 10/039,291

Art Unit: 1614

308-4556 for regular communications and (703) 308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
